

Discounted water butt offer

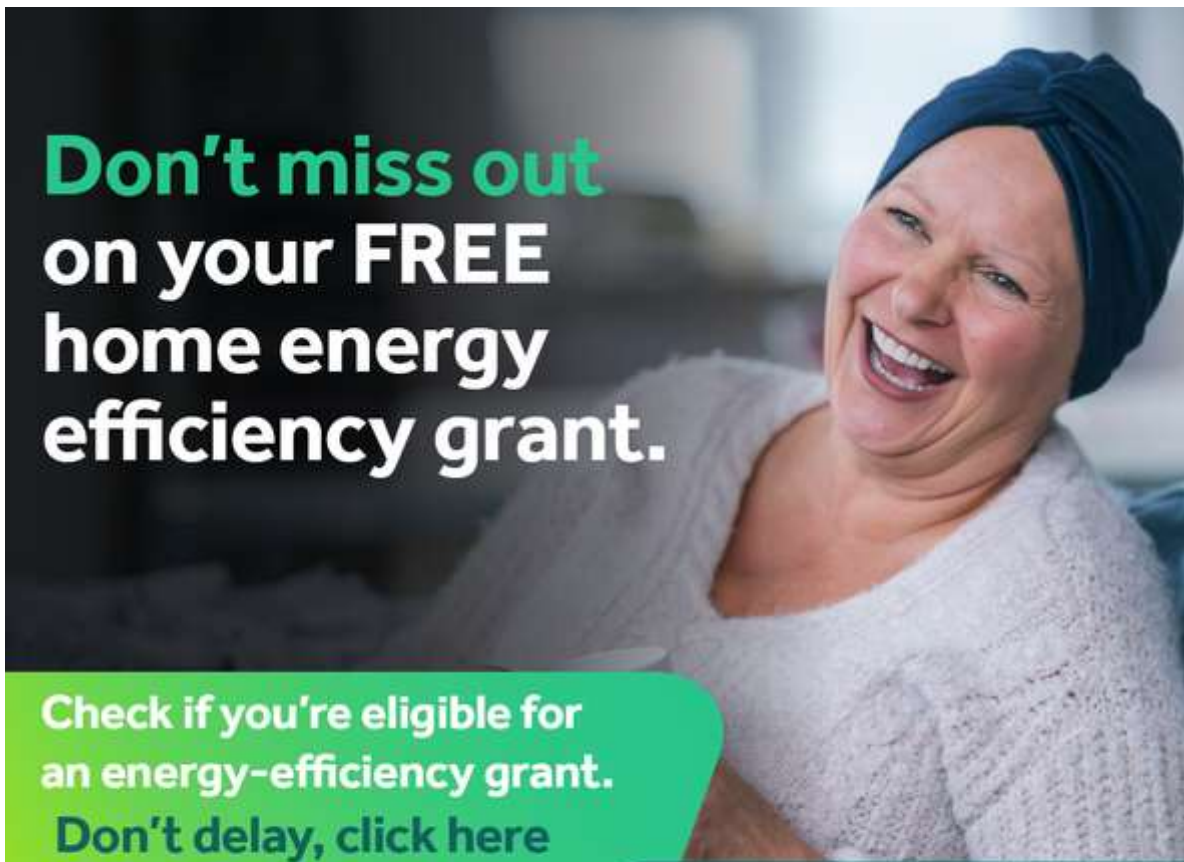

We have teamed up with Essex County Council and Get Composting to offer residents in our district subsidised water butts.

You can choose from either the Mini Rainsaver 100 Litre Water Butt Kit and the Cloudburst 200 Litre Water Butt Kit, however please be aware supply is limited and will sell out quickly. Both water butts are made from 100% post-consumer recycled plastic and are good for people's gardens and also the planet.

Help save precious water and become part of the environmental water solution today.

and APPLY NOW**

Deadline for applications is 31st December 2022

#STAYWARM&SAVE

 Department for
Business, Energy
& Industrial Strategy

 **Sustainable
Warmth**

 **WARMWORKS**

Sustainable Warmth is a new Government grant scheme designed to fund energy-efficiency upgrades to residents who are most likely to be impacted by the high cost of rising bills. These improvements will help residents to use less energy and spend less on their energy bills.

How it helps:

- Energy saving tech and upgrades installed by approved installers
- Creating warmer, healthier homes
- Helping to cut carbon emissions
- Funding available for homes on and off the gas grid

The energy-efficiency grants cover a range of energy-saving home improvements designed to balance the needs of residents with carbon reduction and grant availability.

Garden waste collections will be suspended soon

The garden waste collection is suspended during the winter months. Please check your collection calendar for your last collection date. You can also check online on our [website](#).

As an alternative, why not think about composting at home? It's a natural process that turns your food and garden waste into soil improver for your garden. Composting can reduce the amount of waste needed to be processed elsewhere. In Essex, food and garden waste makes up 25% of the general waste we throw away.

Love Essex is offering residents discounted compost bins and you can also try their new FREE online course to find out about the benefits of composting and how to get started.

Composting creates a great environment for insects such as worms and beetles. They'll work hard digesting your food and garden waste into valuable soil improver. By encouraging insects, you may also encourage other wildlife such as garden birds, hedgehogs and maybe even slow-worms.
