Dear Customer

Installation of electricity cables in Witham.

We run the electricity network delivering power to your area and we will shortly be starting a project to provide a new connection for a customer in the area.

In partnership with our contractor, Kier, we are installing underground electricity cables from our substation near B1018 towards Hollies Road. The next phase of work will be taking place on Braintree Road – B1018

In order to work safely, there will multi-way signals in place on **Braintree Road from outside the Crossing Substation to the junction with Polecat Road from 30 May 2023 to 15 September 2023..** We thank you for your cooperation, which will ensure we complete the work as quickly as possible.

Our work should have no impact on your electricity supply. The project involves excavating short trenches to lay pipework (ducts) and pulling through new underground cables. This allows us to keep the excavations as small as possible. We will return to open excavations at intervals along the route to pull the new cables into position and join them to our electricity network.

There will be some noise from the digging activities during these works, and you will see members of our teams working in the public highway behind safety barriers.

Access to all affected properties along the route will continue to be maintained at all times. For local refuse collection services, there will be no changes to collection days and access for these vehicles will be permitted throughout the work. For access to garages, please notify a member of the site team if you require support with this.

We have worked closely with the local authority in planning this project to minimise disruption to the local community wherever possible.

We apologise for any inconvenience caused and will make every effort to minimise the impact on your neighbourhood. If you have any questions, please contact our contractor's Stakeholder and Streetworks Manager, Ema Thomson on 0845 2000 214. Additionally, you can contact our customer care team on **0800 028 4587** or care@ukpowernetworks.co.uk.

Yours sincerely

Ian Thirkettle
